

Software engineer positions

If you are a talented engineer/scientist with strong programming skills and wish to work in a flexible, fast paced and dynamic environment, please send your resume and a motivation letter to Nhumi Technologies GmbH by email at job@nhumi.com.

Nhumi is extending its development team and is currently looking for team members with skills in the following areas:

- Data Analytics and Medical Terminologies
- Web services & Javascript programming
- 3D graphics & Computational Geometry
- Text & Web mining
- Distributed computing and systems engineering

If you have skills in one or more of these topics, we look forward to hearing from you.

We offer a dynamic start-up environment where you will be exposed to all the activities of a software project - from design and test to delivery and project management. As part of the Nhumi team, you will work independently and will have daily exchanges with all the stakeholders including end-users. You will be regularly exposed to technical and organizational challenges that will require strong problem solving and communication capabilities. Working in a small group, you will exchange ideas and knowledge seamlessly with your colleagues.

Required skills:

- English speaking (German a plus)
- MSc or PhD or more than 3 years experience in a software development team

Job location:

- Nhumi Technologies, Zurich

About Nhumi

Nhumi Technologies GmbH is a Swiss start-up based in Zürich and developing an innovative software to navigate healthcare data using a 3D model of the human anatomy. The purpose is to enable users to see medical information directly on a 3D avatar. Users are patients, doctors, nurses but also scientists and more generally anyone requesting healthcare content and needing a fast and intuitive access.
